

EMPLOYMENT OPPORTUNITY

Website Developer (Applications Programmer II) Req# 34121

The UCLA Center for Health Policy Research's IT Team is looking to hire a frontend Drupal Developer and administrator to manage our public-facing websites.

Responsibilities:

The developer will primarily support web modernization and redesign projects and will be the Center's primary point of contact for internal and external web related inquiries. The developer will be responsible for designing and implementing new frontend features and functionalities and managing all technical aspects of our content management systems.

The ideal candidate must have a strong understanding of industry trends and popular content management systems, experience with responsive design, experience with SEO, and an understanding of the entire web development process, including design, development and deployment.

Qualifications:

- Degree in Website Development, Computer Science, Computer Information Systems or related field, or an equivalent combination of education and experience.
- Minimum 3 years of experience in building responsive website pages and designs on Drupal 8 or 9.
- HTML5, CSS/CSS3, and JavaScript/jQuery, and PHP development experience.
- Advanced site-building experience including familiarity with Drupal modules and tools such as CTools, Views, Lists, Menus, and Panels.
- Advanced knowledge in the latest website design and development techniques, technologies, guidelines and recommendations.
- Extensive experience in Drupal 8/9 site administration.
- Basic Microsoft IIS, Microsoft Azure, and WordPress Experience.
- Experience with Aquia Drupal Hosting, Pantheon Drupal Hosting, any shared Linux web hosting environment, and C-Panel.
- Experience with SEO including familiarity with the latest search engine recommendations and online visibility improvement techniques.
- Basic experience using design software such as Adobe Photoshop and Dreamweaver.
- Demonstrated technical project management experience.
- Deep understanding of the entire web development process, including design, development and deployment.
- Detail oriented, organized, willing to continuously learn and improve, and a good team player.
- Strong initiative, work ethic, creativity, and time management skill.
- Demonstrated ability to write clear, precise, and grammatically correct technical documentation and status reports.

- Demonstrated skill in organizing a complex workload, and ability to plan and prioritize the work, seeking and applying new knowledge in solving problems.
- Must have strong organizational, interpersonal, communication, and problem-solving skills, and the ability to provide users who have a wide range of technical skills with technical support in clear and understandable language.
- Demonstrated experience in researching and determining the best product and best pricing in order to stay within budget while remaining highly effective.
- Ability to create presentations and provide training to users on a variety of levels.

Other Details:

Full-time, Contract position. Salary commensurate with experience. Excellent benefits. Equal Opportunity Employer.
