EMPLOYMENT OPPORTUNITY

Website Developer
(Programmer/Analyst II)
Req# 33375

The UCLA Center for Health Policy Research's IT Team is looking to hire a full-stack (front-end and back-end) Drupal Developer and website administrator to manage our external public-facing websites.

Responsibilities:
The developer will primarily support web modernization, maintenance, and redesign projects. The developer will be responsible for designing and implementing new features and functionality, establishing and guiding the website's architecture, ensuring high-performance and availability, and managing all technical aspects of our various content management systems.

The best candidate must have a strong understanding of industry trends and popular content management systems, experience with responsive and adaptive design, excellent knowledge and experience with SEO, and an understanding of the entire web development process, including design, development and deployment.

Qualifications:
- Advanced degree in Computer Science, Computer Information Systems or related field, or an equivalent combination of education and experience.
- Experience building responsive websites using Drupal CMS 8 or 9, HTML/HTML5, CSS/CSS3, and JavaScript/jQuery, and PHP.
- Advanced site-building experience including deep familiarity with Drupal modules and tools such as CTools, Views, Lists, Menus, and Panels.
- Advanced knowledge in the latest website design and development techniques, technologies, guidelines and recommendations.
- Extensive experience in Drupal 8/9 site administration.
- Experience in managing and integrating data visualization dashboards using online SaaS sites such as ArcGIS, Tableau, and R-Studio.
- Experience with Microsoft SQL, ASP/ASPX, Microsoft IIS, WordPress, and C-Panel.
- Experience with SEO and SEO monitoring tools including knowledge of the latest search engine recommendations and online visibility improvement techniques.
- Basic digital marketing and online visibility management experience and experience using digital marketing tools.
- Experience using design software such as Adobe Photoshop, Illustrator, InDesign, and Dreamweaver.
- Demonstrated technical project management experience.
- Experience building and configuring API communication modules and experience managing and developing custom APIs.
- Deep understanding of the entire web development process, including design, development and deployment.
• Detail oriented, organized, willing to continuously learn and improve, and a good team player.
• Strong initiative, work ethic, creativity, and time management skill.
• Demonstrate high degree of detailed accuracy in all projects, tasks and in dealings with outside vendors and collaborators.
• Demonstrated ability to write clear, precise, and grammatically correct technical documentation and status reports.
• Demonstrated skill in organizing a complex workload, and ability to plan and prioritize the work, seeking and applying new knowledge in solving problems.
• Must have strong organizational, interpersonal, communication, and problem-solving skills, and the ability to provide users who have a wide range of technical skills with technical support in clear and understandable language.
• Demonstrated experience researching and determining the best product and best pricing in order to stay within budget while remaining highly effective.
• Ability to make oral presentations and provide training to users on a variety of levels on use of relevant software and hardware.
