

**STEP 2 PLANNING WORKSHEET: ISSUES, PROBLEMS, GOALS AND OBJECTIVES**

<b>Prioritized Public Health Issues</b>	<b>Defined Public Health Problems</b>	<b>Goals</b>	<b>Objectives</b>
Example:  Cervical cancer	Cervical cancer is common in our community and low-cost pap test services are lacking. This means preventable cases and deaths are occurring.	To understand who has cervical cancer in our community.	1. Conduct a survey among community women between ages 18-44 in July to collect cervical cancer and screening history. 2. Conduct focus groups with community women participating in outreach program to determine barriers to regular screening.
