US Congressional	52	40,000	5.6%	4.0%	7.3%	lower
US Congressional	53	61,000	8.3%	5.7%	11.0%	

Notes:

¹Current asthma is defined as ever diagnosed with asthma and reporting current asthma or an asthma attack/episode in the last year.

† Estimate should be interpreted with caution because it is either unstable (coefficient of variation $\geq 40\%$) or it has a wide confidence interval (> 20 percentage points).

Lower and Upper CI denotes 95% confidence intervals for every calculated estimates. This means that the actual value lies between the lower and upper range.

Compared to State denotes estimates of districts that are significantly higher or lower than the overall California estimate. Blank cells denote no significant difference.

Source: 2009 California Health Interview Survey (CHIS). Boundaries for legislative districts were approximated using 2010 Census tracts.
