Notes:

¹ Current asthma is defined as ever diagnosed with asthma and reporting current asthma or an asthma attack/episode in the last year.

Current Asthma¹ by CA Senate District, All Ages, CHIS 2009

Prepared by the UCLA Center for Health Policy Research, October 2012

† Estimate should be interpreted with caution because it is either unstable (coefficient of variation $\geq 40\%$) or it has a wide confidence interval (> 20 percentage points).

Lower and Upper CI denotes 95% confidence intervals for every calculated estimates. This means that the actual value lies between the lower and upper range.

Compared to State denotes estimates of districts that are significantly higher or lower than the overall California estimate. Blank cells denote no significant difference.
