Notes:

¹ Exchange eligible with and without subsidies is defined as the percent of non-elderly who were uninsured all or part of the year and are eligible to purchase health insurance in the Exchange that will be created in 2014 as part of the Affordable Care Act (ACA).

† Estimate should be interpreted with caution because it is either unstable (coefficient of variation $\geq 40\%$) or it has a wide confidence interval (> 20 percentage points).

Lower and Upper CI denotes 95% confidence intervals for every calculated estimates. This means that the actual value lies between the lower and upper range.
