Uninsured Any Time in 2009¹ by US Congressional District, Non-elderly age 0-64 , CHIS 2009

Prepared by the UCLA Center for Health Policy Research, October 2012

District Type	District Number	Number Impacted	Percent	Lower CI	Upper CI	Compared to State
US Congressional	44	153,000	25.9%	17.8%	34.1%	
US Congressional	45	84,000	13.4%	7.7%	19.1%	lower
US Congressional	46	263,000	41.8%	32.6%	50.9%	higher
US Congressional	47	144,000	19.3%	11.6%	26.9%	
US Congressional	48	119,000	19.0%	11.8%	26.3%	
US Congressional	49	120,000	19.1%	12.0%	26.1%	
US Congressional	50	126,000	20.4%	15.3%	25.4%	
US Congressional	51	156,000	25.6%	21.7%	29.4%	higher
US Congressional	52	100,000	15.8%	8.7%	23.0%	
US Congressional	53	113,000	17.4%	13.5%	21.3%	

Notes:

¹ Uninsured anytime in 2009 is defined as the percent of the non-elderly (0-64 years) who were without insurance at any point during the past year.

† Estimate should be interpreted with caution because it is either unstable (coefficient of variation $\geq 40\%$) or it has a wide confidence interval (> 20 percentage points).

Lower and Upper CI denotes 95% confidence intervals for every calculated estimates. This means that the actual value lies between the lower and upper range.

Compared to State denotes estimates of districts that are significantly higher or lower than the overall California estimate. Blank cells denote no significant difference.

Source: 2009 California Health Interview Survey (CHIS). Boundaries for legislative districts were approximated using 2010 Census tracts.
