Notes:

<sup>1</sup> Uninsured anytime in 2009 is defined as the percent of the non-elderly (0-64 years) who were without insurance at any point during the past year.

† Estimate should be interpreted with caution because it is either unstable (coefficient of variation  $\geq 40\%$ ) or it has a wide confidence interval ( $> 20$  percentage points).

## **Uninsured Any Time in 2009<sup>1</sup> by CA Senate District, Non-elderly age 0-64 , CHIS 2009**

Prepared by the UCLA Center for Health Policy Research, October 2012

**Lower and Upper CI** denotes 95% confidence intervals for every calculated estimates. This means that the actual value lies between the lower and upper range.

**Compared to State** denotes estimates of districts that are significantly higher or lower than the overall California estimate. Blank cells denote no significant difference.
