California Assembly District 18

This Assembly District Health Profile provides data on key health topics for the approximately 425,000 adults and children living in Assembly District 18 of California. Estimates are based on the 2011-2012 California Health Interview Survey (CHIS). Boundaries for legislative districts were approximated using Census tracts.

### Demographics

</tbody>
</table>

**Notes**

2. Other Race includes Native Hawaiian, Pacific Islander, American Indian, Alaska Natives, any other race and two or more races.
3. FPL is the Federal Poverty Level.
4. Defined as the percent of the non-elderly (0-64 years) who were without insurance at any point during the past year.
5. Defined as the percent of non-elderly (0-64 years) who were uninsured all or part of the year and are eligible to purchase health insurance in the Exchange as part of the Affordable Care Act (ACA).
6. Defined as the percent of non-elderly (0-64 years) who were uninsured all or part year and are eligible for health insurance coverage under Medi-Cal Expansion as part of the Affordable Care Act (ACA).
7. Defined as ever diagnosed with asthma and reporting current asthma or an asthma attack/episode in the past year.
8. Defined as having smoked at least 100 cigarettes in entire lifetime and currently smokes everyday or some days.
9. Defined as the percent of adults (18 years and over) whose body mass index (weight [kg] / height [m²]) is greater than or equal to 30.0.
10. Defined as having smoked at least 100 cigarettes in entire lifetime and currently smokes everyday or some days.
11. Defined as having smoked at least 100 cigarettes in entire lifetime and currently smokes everyday or some days.
12. Defined as having smoked at least 100 cigarettes in entire lifetime and currently smokes everyday or some days.

**Compared to State** denotes whether district estimates are statistically different from the state. District estimates that are significantly higher than the state have an up arrow, while estimates that are significantly lower have a down arrow.

**Notes**

2. Other Race includes Native Hawaiian, Pacific Islander, American Indian, Alaska Natives, any other race and two or more races.
3. FPL is the Federal Poverty Level.
4. Defined as the percent of the non-elderly (0-64 years) who were without insurance at any point during the past year.
5. Defined as the percent of non-elderly (0-64 years) who were uninsured all or part of the year and are eligible to purchase health insurance in the Exchange as part of the Affordable Care Act (ACA).
6. Defined as the percent of non-elderly (0-64 years) who were uninsured all or part year and are eligible for health insurance coverage under Medi-Cal Expansion as part of the Affordable Care Act (ACA).
7. Defined as ever diagnosed with asthma and reporting current asthma or an asthma attack/episode in the past year.
8. Defined as having smoked at least 100 cigarettes in entire lifetime and currently smokes everyday or some days.
9. Defined as the percent of adults (18 years and over) whose body mass index (weight [kg] / height [m²]) is greater than or equal to 30.0.
10. Defined as having smoked at least 100 cigarettes in entire lifetime and currently smokes everyday or some days.
11. Defined as the percent of adults who had difficulty reliably putting food on the table in the past year. The question assumes that adults who are above 200% of the federal poverty level are food secure.
