US Congressional	50	64,000	12.5%	9.4%	15.6%	
US Congressional	51	114,000	23.4%	17.7%	29.0%	higher
US Congressional	52	38,000	7.1%	3.7%	10.4%	lower
US Congressional	53	68,000	12.9%	8.2%	17.6%	

Notes:

<sup>1</sup> Low-income food insecurity is defined as percent of adults in the population who had difficulty reliably putting food on the table in the last year and were under 200% of the federal poverty level.

**Lower and Upper CI** denotes 95% confidence intervals for every calculated estimates. This means that the actual value lies between the lower and upper range.

**Compared to State** denotes estimates of districts that are significantly higher or lower than the overall California estimate. Blank cells denote no significant difference.

Source: 2011-2012 California Health Interview Survey (CHIS). Boundaries for legislative districts were approximated using 2010 Census tracts.
