CA Assembly	80	96,000	30.1%	24.4%	35.9%	

Notes:

¹ Obese is defined as the percent of adults (18 years and over) whose body mass index (weight [kg] / height [m²]) is greater than or equal to 30.0.

Lower and Upper CI denotes 95% confidence intervals for every calculated estimates. This means that the actual value lies between the lower and upper range.

Compared to State denotes estimates of districts that are significantly higher or lower than the overall California estimate. Blank cells denote no significant difference.

Source: 2011-2012 California Health Interview Survey (CHIS). Boundaries for legislative districts were approximated using 2010 Census tracts.
