## Additional Features for Results in AskCHIS<sup>®</sup> Neighborhood Edition

There are several additional options for your results in *Ask*CHIS© including the ability to export data to excel and save your results:

• **Export to Excel:** Data tables can be exported to Excel for further analysis. (See the arrow in the screen shot below).

**Export graphs and maps:** Graphs, maps and data tables can also be exported separately for further analysis. (See the arrow in the screen shot below).

**Manipulating a Histogram to Change Data and Map Views:** Move the vertical axis on the detailed histogram to change the map view. See below. As you move to the right or left, you remove shading for areas with a lesser value (if moving from the left) or higher value (if moving from the right). The areas you remove will become a shade of gray. In the example below, only the areas with a high percentage of individuals with a less than a high school education remain shaded blue

When you move the vertical access further right into the histogram, the interactive data display and map will update.
