1. Introduction

1.1 AANHPI 2021 Survey Data File

The 2021 AANHPI Follow-on Study (AANHPI 2021) Data File consists of individual records obtained from the 2021 data collection period of the AANHPI survey. The AANHPI survey is a follow back study of the California Health Interview Survey (CHIS). 2021 CHIS public use file variables are also found in the AANHPI 2021 data file.

The UCLA-Center for Health Policy Research (UCLA-CHPR) is responsible for maintaining consistent standards to protect respondent confidentiality as specified in approved protocols by the UCLA IRB (IRB# 19-001082) and the California Committee for the Protection of Human Subjects (2019-080-UCLA). The data files listed below must be maintained in accordance with the provisions of the data use agreement between the recipient and UCLA-CHPR. In order to protect respondent confidentiality, UCLA-CHPR maintains the most confidential and sensitive CHIS data only in its files at the Data Access Center (DAC) located at UCLA-CHPR. Researcher access to confidential data is available by application to the DAC. For more information, please contact dacchpr@ucla.edu. Limited technical assistance is also available.

1.2 Accompanying Files

In addition to the data file are several accompanying files that facilitate use of the data file; some are not necessary for data analysis but add convenience in utilizing the main data.

- a. **Data file:** AANHPI_PUF.SAS7BDAT
- b. **Proc format file:** ADULT_PROC_FORMAT.SAS
- c. **Format file:** ADULT_FORMAT.SAS
- d. **Label file:** ADULT_LABEL.SAS

2. AANHPI Data Dictionary

How to Use the Data Dictionary

This Data Dictionary describes the variables in the AANHPI 2021 data file. The index of the data dictionary lists variables first in alphabetical order and then in the order they were administered in the survey questionnaire, with California Health Interview Survey (CHIS) variables first, followed by AANHPI follow back study variables.

The data dictionary contains the following fields:

- **VARNAME:** The names of the variables.
- **LABEL:** A description (or label) of the variable which is the same as what is included in the label file described in Section 1.2.
- **VALUE:** Response categories and their sample distributions of categorical variables. The following negative values are used for all variables:

- 1: INAPPLICABLE.
- 2: PROXY SKIPPED.
- 7: REFUSED.
- 8: DON'T KNOW.
- 9: NOT ASCERTAINED.

- **UNIVERSE:** The scope of eligible respondents for the corresponding item. For some questions and variables, certain respondents become ineligible due to skip patterns or other restrictions (e.g., age and sex).
- **INPUT VAR:** Source variables used to construct the one in the **VARNAME** field.
- **NOTES:** Additional information about the variable.
