

Characteristics of Adults age 65 and older with Incomes Below the 2007 Elder Economic Security Standard™ Index, California

County Numbers and Percents, State Totals, and County Comparisons Single and Couple Adults age 65 and older Living with Others

**Prepared by Steven P. Wallace, PhD
D. Imelda Padilla-Frausto, MPH
L. Cricel Molina, MPH
Y. Jenny Chia, PhD**

February 2009

The methodology for this report was developed by UCLA Center for Health Policy Research in collaboration with the Insight Center for Community Economic Development, Oakland, CA

The Elder Index is based on the methodology originally developed by the Gerontology Institute, University of Massachusetts-Boston and Wider Opportunities for Women

Funding for this report provided by the University of California's Program on Access to Care (CPAC), Area Agency on Aging of Los Angeles County, Aging & Independent Services of San Diego, and Insight Center for Community Economic Development, Oakland, California.

This report is part of the California Elder Economic Security Initiative™ program (Cal-EESI) which is led by the Insight Center for Community Economic Development, Oakland, California, with the guidance of a statewide steering committee. Cal-EESI is part of a national initiative led by Wider Opportunities for Women (WOW), Washington, DC, which holds the trademarks for the terms Elder Economic Security Initiative program, Elderly Economic Security Standard Index, EESI, and Elder Index. The national methodology was developed by the Gerontology Institute at UMass-Boston in collaboration with WOW. The UCLA Center for Health Policy Research used the national methodology to model the data for California.

California

Characteristics of Adults Age 65+ with Incomes Below the 2007 Elder Economic Security Standard™ Index (Elder Index)

Elder Economic Security Standard™ Index

The Elder Economic Security Standard™ Index is the basic income needed to make ends meet for persons age 65 and older. It reflects actual costs at the county level for housing, health care, food, transportation, and other costs in different housing types.

Source: http://www.healthpolicy.ucla.edu/elder_index08feb.html

Federal Poverty Level (FPL)

Officially called the Federal Poverty Guideline (also called the Federal Poverty Level or FPL), it is used by many public programs to calculate eligibility. In 2007, the Federal Poverty Level for one adult age 65+, living anywhere in the country was \$10,210 per year.

Source: <http://aspe.hhs.gov/poverty/>

Above FPL and Below the Elder Index

Persons age 65 and older whose income is in the gap above the Federal Poverty Level and below the Elder Index. These elders often do not qualify for public supports and do not have enough to cover their basic expenses. The Elder Index demonstrates that many older Americans who are not "poor", as defined by the FPL, still do not have enough income to meet their basic needs.

Single Elder (living with others)

A person age 65 and over who is in a household containing two or more persons but who is not living with their spouse or partner. Examples can include an older widow living in an adult child's home or an older divorcee who is raising a grandchild in her own home. The calculation is based on only the older adult (one person) and their personal income.

Couples (living with others)

Couples who are in households with three or more persons. Examples include older couples living in an adult child's home or an older couple raising grandchildren in their own home. The calculation is based on only the couple (two person) and their income.

Total Below Elder Index (Economically Insecure)

All persons age 65 and older in all living arrangements, except nursing homes, whose income is below the Elder Index (Economically Insecure). The Elder Index measures how much income is needed for retired adults age 65+ to meet basic needs in each county of California.

Economically Insecure (Below Elder Index) Adults Age 65+ by Subgroup Total

These data provide the percent and number of older adults who are economically insecure (below the Elder Index) in each living arrangement. Within each of the four living arrangements, data is provided for those who are economically insecure according to their housing status, gender, age, and race and ethnicity. For example, under the section Gender: the table shows among single women 65+ who live with others, the percent and number who are economically insecure. It also shows among single men 65+ who live with others, the percent and number who are economically insecure. In cases where the results are fewer than 1,000 people below the elder index for a particular subgroup, the number is too small to calculate a reliable estimate and therefore not included.

Data for these tables are based on the U.S. Census 2006 American Community Survey (ACS) and the California Elder Economic Security Standard™ Index adjusted to 2006.

UCLA CENTER FOR
HEALTH POLICY RESEARCH

Wider Opportunities for Women

Characteristics of Adults Age 65+ with Incomes Below the 2007 Elder Economic Security Standard™ Index (Elder Index) Clustered California Counties

Methodology for Clustered Counties

Due to small numbers and unreliable estimates in some individual counties, a 2-step method was used to cluster the counties listed on this page to produce reliable estimates.

The first step clustered counties according to the the Public Use Microdata Areas (PUMAs) as defined by the Census. PUMAs are special non-overlapping areas that partition a state, and each PUMA contains a total population of about 100,000. State governments drew the PUMA boundaries at the time of the 2000 Census.

http://www.census.gov/acs/www/Products/users_guide/acs_2006_reference_maps.htm

If these clusters and/or other individual counties still contained small numbers and unreliable estimates when subset to older adults, the second step combined PUMA clusters or other individual counties according to the California Department of Aging, Planning and Service Areas (PSAs). In some instances, the PUMAs and PSAs did not coincide and exceptions are noted.

The following counties are clustered according to the Public Use Microdata Areas (PUMAs) as defined by the Census.

<http://www.census.gov/geo/puma/puma2000.html>

Alpine, Amador, Calaveras, Inyo, Mariposa, Mono and Tuolumne comprise PUMA #1800

[Alpine](#) [Amador](#) [Calaveras](#) [Inyo](#)
[Mariposa](#) [Mono](#) [Tuolumne](#)

Monterey and San Benito comprise PUMA #3002

[Monterey](#) [San Benito](#)

Lake and Mendocino comprise PUMA #400

[Lake](#) [Mendocino](#)

The following counties are clustered due to small numbers in at least one of the counties. The clusters are consistent with the CA Department of Aging Planning and Service Areas (PSA). PSA county clustering can be obtained at the Triple-A Council of California.

<http://www.4tacc.org/>

Kings and Tulare Counties follow PSA 15

[Kings](#) [Tulare](#)

Fresno and Madera Counties follow PSA 14

[Fresno](#) [Madera](#)

Napa and Solano follow PSA 28

[Napa](#) [Solano](#)

The following clusters contain PUMA clusters with small numbers and unreliable estimates of older adults. Further clustering follows PSA county clusters with exceptions noted.

Butte County is combined with PUMA cluster #500, Colusa, Glenn, Tehama and Trinity, to follow PSA 3. Note: Due to the composition of Census PUMAs, this cluster differs from PSA3 by including Trinity and excluding Plumas.

[Butte](#) [Colusa](#) [Glenn](#) [Tehama](#)
[Trinity](#)

Shasta County is combined with PUMA cluster #100 Del Norte, Lassen, Modoc, and Siskiyou to follow PSA 2. Note: Due to the composition of Census PUMAs, this cluster differs from PSA2 by including Del Norte and excluding Trinity.

[Del Norte](#) [Lassen](#) [Modoc](#) [Shasta](#)
[Siskiyou](#)

Yolo County is combined with two PUMA clusters: Nevada, Plumas, & Sierra (#700) and Sutter & Yuba (#800) to follow PSA 4. Note: Due to composition of Census PUMAs, this cluster differs from PSA 4 by including Plumas and excluding Placer and Sacramento (available separately).

[Nevada](#) [Plumas](#) [Sierra](#) [Sutter](#)
[Yolo](#) [Yuba](#)

Source: U.S. Bureau of the Census, 2005 American Community Survey (ACS)

* County totals do not equal 100% because some elders report "other" housing arrangements.

Note: The following counties were combined in the U.S. Census ACS data

- (1) Del Norte, Lassen, Modoc, Siskiyou
- (2) Colusa, Glenn, Tehama, Trinity
- (3) Nevada, Plumas, Sierra
- (4) Sutter, Yuba
- (5) Monterey, San Benito
- (6) Alpine, Amador, Calvaeras, Inyo, Mariposa, Mono, Tuolumne
- (7) Mendocino, Lake
